

DEUTSCHE HYDRAPRO

SUPERIOR BRAKING POWER

PROVIDING INNOVATIVE HYDRAULIC DRIVE AND CONTROL TECHNOLOGIES

The Hydrapro electric over hydraulic brake actuator's quality and simplicity gives you the necessary reliability for a trailer braking system. In addition, it has a superior response time that delivers shorter stopping distances, which gives the driver confidence while towing.

AVAILABLE MODELS:

- Alpha G-1600X
(1600psi w/ Larger Fluid Capacity)
- Alpha G-1600
(1600psi for Disc Brakes)
- Alpha G-1200
(1200psi for Drum Brakes w/ 8k or Higher Axles)
- Alpha G-1000
(1000psi for Drum Brakes w/ 8k or Lower Axles)

NOW FEATURING GENERATION 3 UPGRADES

- Built-in Compatibility Adapter
- Better Proportional Braking Range
- Higher Braking Force in Relation to Power Draw
- x3 Longer Lasting Durability in Extreme Testing
- More Consistent Braking Force at Maximum Pressure

WHY DEUTSCHE HYDRAPRO

With its anodized, T6-grade extruded alloy housing, our Electric-Over-Hydraulic (EOH) Brake Actuators are built with the highest quality standards to withstand even the harshest conditions. Our products are engineered for long-term durability and provide superior performance with reliable braking power. We use state-of-the-art technology to ensure that our customers get the best possible brake performance so you can feel confident no matter what you're hauling. Its compact size allows for easy installation and a brake line fitting with 360 degrees to connect your brake line from all mounting positions.
