

## TOURING COIL SUSPENSION

Bumps, potholes, and everyday rough roads don't stand a chance against CURT's state of the art towing technology. The touring edition suspension provides superior cushioning all while utilizing 50% fewer fasteners to minimize servicing.

## MADE SMARTER. MADE TO ENHANCE. MADE BY CURT.

### Less roughness, more comfort

● Touring Coil Suspension ● Traditional Leaf Spring

Suspension system reduces shock absorption into the frame of the RV by 50%, providing a smoother, safer ride

### Advanced engineering

Trailing arm style suspension with coil springs and shock absorbers

### Available in single or tandem configurations

### Designed for maximum longevity

Robustly designed with 50% fewer fasteners to reduce service needs

### Additional Features

- Coil suspension eliminates shakedown due to massive reduction in road vibration, reducing service and warranty needs
- Suspension system reduces rattling and vibration for a more comfortable ride
- Provides nearly 2x more articulation compared to a leaf spring suspension
- Ideal suspension to combat everyday potholes, rough highways, and roads
- Improved design extends longevity compared to leaf springs
- Coil spring systems require less maintenance than other types of suspension systems
- Track bar design stabilizes the axles and suspension and reduces chassis movement during extreme turn situations
- Durable powder coat finish for enhanced corrosion resistance
- Weight capacities of up to 5,200 lbs. per axle and available in single and tandem configurations
